**Iasonas Kokkinos**
Research Manager at Snap Inc.
4d · Edited

A few months ago Ariel AI joined Snap to bring full-body 3D understanding to augmented reality.

Today, multi-person 3D body tracking is included in the Lens Studio 3.4 release https://lnkd.in/dX-A78U, making our technology available to Snap's Lens Creator and developer ecosystem and hundreds of millions of Snapchatters.

A massive thanks to everyone that helped us on our journey so far; this is just the beginning!
