About Accelrys

Accelrys (NASDAQ:ACCL), a leading provider of scientific innovation lifecycle management software, supports industries and organizations that rely on scientific innovation to differentiate themselves. The industry-leading Accelrys Enterprise Platform provides a broad, flexible scientific foundation optimized to integrate the diversity of science, experimental processes and information requirements across the research, development, QA/QC and manufacturing phases of product development. Accelrys offers capabilities in scientific data management, modeling and simulation, research informatics, laboratory informatics, enterprise quality management, environmental health & safety and operations intelligence for customers in science-driven industries. Using Accelrys technology, scientific innovators can access, organize, analyze and share data in unprecedented ways, ultimately enhancing innovation, improving productivity and compliance, reducing costs and accelerating product development from research to manufacturing.

Our more than 2,000 customers include most of the world's leading companies including:

- ▶ 10 of the top 10 pharmaceutical companies
- ▶ 4 of the top 5 consumer packaged goods companies
- ▶ 20 of the top 25 biotech companies
- ▶ 5 of the top 10 oil and gas companies
- ▶ 7 of the top 10 chemical companies
- ▶ 5 of the top 5 aerospace companies
